RESPONDERS' COMMENTS FOR EC 201 732 (US20)

Question 6: Please provide any comments concerning this course and/or instructor below.

- I liked how this intro to microeconomics course had a fair amount of math built into the curriculum. My economics course in high school focused mainly on important terms and learning the basics, so getting to build on that with some math also was nice.
 - I really disliked the pre recorded lectures. I learned more from you than I did wasting my time with the lectures.
 - I really enjoyed the class, and liked the zoom meetings we had with Andrew. I learned a lot and had a fun time while learning.
 - I'm a freshman student, so I don't know if it's a common situation that the zoom sessttion only reviews topic instead of teaching. I was hoping the live session can more about teaching instead of reviewing.
 - Mr. Earle was great! I wish the course could have been a bit more deep and interactive, but I understand that was limited because of time constraints.
 - N/A
 - none
 - The class was good.
 - The overall structure of the course was well organized, however, the head instructor of the course wasn't the ideal fit for the class. A real professor would have been a much better fit for the clas compared to a graduate student.
 - The professor was very nice and helpful. He was able to help very well. In the midterm and final, the topics and concepts didn't match the problem sets or assignments for that specific topic. The questions were totally different and were inference based. Overall, i did like the class.
 - This professor was great!
 - We only had one zoom call as a class per week. However, I think it would have benefited a lot of the students in the class if we had more than one class.
-
